

*Did you know that we purchase used equipment?*

If you have a surplus of used equipment then we should be your next call. Our process is simple: reach out and provide a list of equipment. From there we will check the industry for current needs and get back to you with a quoted amount. Easy right?

And, while we're on the topic there is a particular demand for Calix "GE" model ONTS and we will buy them regardless of condition ~ defective or working. Let's get these off your hands and into ours!

## Goals Met & Exceeded

Like all businesses, our team set a few goals for 2022. So here we are 6 months in and that seems like a great time to recap a particular accomplishment. As part of our grand plan we hired Lauren Roulain to head our Marketing projects and eventually assist us in our sales department. Since her start we have implemented new programs aimed towards strategic marketing so our customers could receive targeted timely and relevant materials. Our website also got a breath of fresh air; updating our content to flow with a priority of ease-of-use. All said, we are so excited to see what the next six months will bring!

## Announcement: Facility Expansion

We are in the initial stages of expanding our repair/ testing facility at our Texas location. As our business has grown it became apparent that we needed more space to carry out your large orders. So, as a customer what does this mean for you?

- Improved lead times
- Larger product availability
- Expanded testing capabilities

We are working to gain all your repair/ testing business!!

**Request A  
Repair Quote**

**WE'RE EXPANDING OUR SALES TEAM.
