

**PP36BBU**

# SFU Battery Backup, 8hr and 24hr Outdoor

Precision Power Outdoor Battery Backup (BBU) allows for scalable battery backup to be mounted wherever the ONT is installed. By partnering with the Precision PP36PB series FTTx Power products, the Precision BBU offers the perfect "add-on" outdoor battery without the need for an outdoor AC outlet near the ONT. The Precision BBU provides an easy upgrade from Power Only deployment to 8 or 24+ hours of battery backup upon customer request and uses existing wiring from power supply to ONT in order to keep install simple and efficient.

## FEATURES

OUTDOOR RATED TO SUPPORT ANY SFU ONT
