

Expanding Reach with New Partnerships

Last quarter we set a goal to broaden our OSP inventory and master the purpose of each product. By doing so we gained four new partnerships. It's time to share these connections & let their products support your next project!

Dura-Line produces telecommunications conduit, cable-in-conduit and other HDPE products and solutions that create physical pathways for fiber and other network technologies; connecting cities, homes and people.

R&M offers solutions in three divisions: LAN and Building Automation, Data Centers, and Public Networks. Complete infrastructures for data centers, housings for network technology, hardware and software for infrastructure management, and its own cable and rack production complete the portfolio.

J&H is a family owned business with over 30 years of experience working with underground enclosures. Their enclosures are Buy American Act Approved and are Tier 22 Rated.

Gaon Cable manufactures high-quality products such as UTP cables, shielded cables (F/UTP, S/FTP), harnesses, wiring materials, optical cables and optical components that play a key role in building high-speed wired and wireless information networks.

Product Highlights with dura·line

HDPE Duct

HDPE duct with a smooth outer wall and internal longitudinal ribs for a reduced coefficient of friction.

FEATURES

- Manufactured from flexible HDPE, makes gradual bends without special equipment
- Internal longitudinal ribbing
- Continuous lengths reduce joining costs
- Excellent low-temperature properties
- Outstanding long-term cable protection
- Provides a permanent pathway, simplifies future cable repairs or replacement
- Available with UV protectant for aerial or lashed placement

MicroDuct & Future Path

MicroDuct is bundled into an easy-to-handle unit known as FuturePath. FuturePath can be installed just like standard duct.

FEATURES

- MicroDucts factory bundled with a polyethylene oversheath
- Multiple configurations available
- Cost-effective –multiple pathways for one installation cost
- FuturePath is designed for installation using the same tools & equipment that are used for traditional conduit or innerduct
- No special tools or equipment are required
- Multiple pathways in place for future growth

Did you know we have a REWARDS PROGRAM?

We want our customers to be rewarded for choosing United Tel Supply. It's our way of saying THANK YOU for trusting us with your business needs.

To begin claiming your rewards click the link to register. Once registered, any product or service totaling \$2,500 or more qualifies you to select a reward of your choosing.

For registration or program questions feel free to reach out to Lauren for assistance: lauren@unitedtelsupply.com
