

## M-FLEXNID

# M-FLEX NID

Designed by installers for installers, the M-FLEX NID's sleek design couples function and size to offer the total Premise Solution. It's universal design provides customized options for Aerial or Underground installs, as well as a compact, low cost option for an Aerial Repair Kit for up to 12 fibers. Whether installing round drop, flat drop or I/O fiber, the M-FLEX NID's unique set of flex-lock split and conduit grommets offer total security and sealant from the outside world. External Locate Lug, strength member securement, dual channel separation for buffer tube and I/O fiber, store over 50 feet of 3.0mm I/O, patch and splice up to 4 fibers, and all in a compact solution...the M-FLEX has you covered!
